think. so".

I made a number of efforts to find the bugs,. without success; last year we employed. professional counter-surveillance people to scan for bugs (see later) again. without result. In autumn 1990 I disposed of my TV and watched virtually no television for the. next three years. But harassment from TV stations has gone on for over. six years and continues to this day. This is something that many people. obviously know is happening; yet the TV staff have. the morality of paedophiles, that because they're getting away with it they feel no. wrong.

Other people who were involved in the abuse. in 1990 were DJs on BBC radio stations, notably disc jockeys from Radio 1 and other. stations (see the following section). Again, since they. don't have sense in the first place they can't be. expect to have the moral sense not to be part of criminal harassment.

-=-
-= MI5: bugging and. counter-surveillance -=
-=-

PO: >Did you ever look for the bugs in your house ? If not, why not ? I. mean if
PO: >I thought that was happening. to me, I'd search the place from top to bottom,
PO: >I mean I live there I would know if anything. was out of place. If I was
PO: >really suspicious, I would call in one of those bug. detection teams which
PO: >have those machines that pick up the transmitted. radio waves. This
PO: >reminds me of. BUGS, that new programme on BBC1 on

That's exactly what we did. We went to a competent, professional. detective
agency in London, paid them over 400 quid to debug our. house. They used
scanner devices which go to over 1 GHz and would pick. up any nearby
transmitter in that range, they also checked the. phones and found
nothing... but if the tap was at the exchange,. then they wouldn't find
anything, would. they?

CS: >Doesn't this suggest to you that. there are, in fact, no bugs to be found?

You can assume that they've done this sort. of thing to other people in more
"serious" cases, where. they would know the targets would suspect the
presence of electronic surveillance. So. they will have developed techniques
and devices which are. not readily detectable either by visual inspection or
by electronic means. What those techniques might be, I couldn't. guess.

In this case, the existence of. bugging devices was clear from the
beginning, and they "rubbed it in" with what was said. by the boy on the
coach. It was almost as if they. wanted counter-surveillance people to be
called in, who they. knew would fail to detect the bugging devices, causing
loss of credibility. to the other things I would have to say relating to the
harassment.

I did all the things someone in my situation would do to try to. find the
bugs.. In addition to calling in professional help using electronic
counter-surveillance, I made a. close visual inspection of electrical
equipment,. plus any points where audio or video surveillance devices might
have been concealed. Of. course, I found nothing. Normal surveillance
"mini-cameras" are quite noticeable and. require visible supporting
circuitry. It seems to me the best. place to put a small video surveillance
device would be additional to a piece of electronic equipment. such as a TV
or video. It would be necessary. to physically break in to a property to fit
such. a device.

-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-
-= how. and why did it start? -=
-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-=-

The. harassment didn't start by itself, so someone must have been there at the outset to give it a firm push and set the "animals" after me. It. looks as if I was set. up in June 1990, and the timing indicates someone from university was. responsible.

>One thing which has been missing from. this discussion is this simple
>prognosis: that maybe he. is right and that, despite his admitted
>mental condition, there really is a campaign against him. organised by
>now-influential ex-students of his. university.

In May or. June 1990, Alan Freeman on Radio 1 read out a letter from someone who had. known me for a few years, who wrote of the one who "wore out his welcome with random precision" (from the. Pink Floyd song). Freeman went on to say to the writer "that's. a hell of a letter you wrote there". The indication. is strongly that people I had parted from soon before nursed a grudge against me and were trying to cause trouble for. me.

The suggestion is. that Freeman might have shown the letter to other people, and things could have snowballed from there. Right. from the start the real source. (security services presumed) didn't announce themselves as the origin, but let the "talkers", the radio DJs, believe that. they were the originators. Think about it; if you announce,. "we're MI5 and we have a campaign against this bloke" then people. might not go along with it; but if you say, "everyone else is. getting at this bloke because he 'deserves' it" then people will join in. with fewer qualms.

>Why would "they" wish to. assassinate your character?

It's the classic case of hitting a cripple to prove you're stronger.. Why would the security. services expend hundreds of thousands of pounds and more than six years of manpower to try to kill. a British citizen? Because they are motivated by people who knew me at university. and feel personal animosity; because they knew me to be emotionally. weak, and it is in the nature of bullies to prey on those. known to be weak; and because they can rely on the complicity of the. establishment, which the security services manipulate and derive funding from. This. is England's biggest humiliation today, and the British security services are intent on preventing. their humiliation. becoming reality by continuing their campaign of attempted murder to suppress the truth from. becoming public.

-=-=-=-=-=-=-=-=-=-=-=-=-
-= who knows. about it? =-
-=-=-=-=-=-=-=-=-=-=-=-=-

Many people know, both in the. establishment and media, and among the general public. Despite an absence of its target from the. UK for more than two. years, the echoes of paranoia can still be heard loud and clear from across the water. When it started in 1990,. the only people who knew were those. in BBC television who were spying on my home, and a few radio broadcasters. There were a few cases of public harassment, but. very little compared to the situation that developed a. couple of years later.

The list today includes BBC TV staff (newsreaders such as. Martyn Lewis, Michael Buerk, Nicholas Witchell), people from radio stations. such as Chris Tarrant of Capital and. Radio 1 DJs, people in the print media, but also many people in the general public. All united. in a conspiracy which breaks the laws which the UK does have regarding. harassment, and all completely uncaring for any semblance of. decency or elementary respect for individual. rights.

The. British police (obviously) do know the nature of the harassment and in all probability the identity of those behind it.. Some time ago I made a complaint to my local police station in London, without. positive result. The UK police are failing in their duty to see the law enforced in. not checking. the abuse.

The article of which part is reproduced below was penned by. Bernard Levin for the. Features section of the Times on 21 September 1991. To my mind, it described the situation at the time and in particular. a recent meeting with a. friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment. over the previous year and a. half.

>There is a madman running. loose about London, called David Campbell; I have
>no reason to believe that he. is violent, but he should certainly be
>approached with caution.. You may know him by the curious glitter in his
>eyes and a persistent trembling of his hands; if. that does not suffice, you
>will find him attempting to thrust no fewer than. 48 books into your arms,
>all hardbacks, with a promise that, if you should return. to the same
>meeting-place next year, he will heave. another 80 at you.
>
>If, by now, the. police have arrived and are keeping a close watch on him,
>you may feel sufficiently emboldened to examine the. books. The jackets are
>a model of. uncluttered typography, elegantly and simply laid out; there is
>an unobtrusive colophon of a rising sun, probably not picked. at random.
>Gaining confidence - the. lunatic is smiling by now, and the policemen, who
>know about such things, have significantly removed their helmets. - you
>could do worse than take the jacket off. the first book in the pile. The
>only word possible to describe the binding. is sumptuous; real cloth in a
>glorious shade of dark green, with. the title and author in black and gold
>on. the spine.
>
>Look at it more closely; your eyes do not deceive you -. it truly does have
>real top-bands and tail-bands, in. yellow, and, for good measure, a silk
>marker ribbon in a lighter green. The paper is cream-wove. and acid-free,
>and. the book is sewn, not glued.
>
>Throughout the encounter, I should have. mentioned, our loony has been
>chattering away, although. what he is trying to say is almost impossible to
>understand; after a time,. however, he becomes sufficiently coherent to make
>clear that he. is trying to sell the books to you. Well, now, such quality
>in bookmaking today can only be for. collectors' limited editions at a
>fearsome. price - #30, #40, #50?
>
>No,. no, he says, the glitter more powerful than ever and the trembling of
>his hands rapidly spreading throughout his entire body; no,. no - the books
>are priced variously at #7, #8 or #9, with the. top price #12.
>
>At this, the policemen understandably put their helmets back on;. one of

>them draws his truncheon and the other can be heard. summoning
>reinforcements on his walkie-talkie. The madman bursts into tears,. and
>swears it. is all true.
>
>And. it is.
>
>David Campbell has acquired the entire rights to the whole. of the
>Everyman's Library, which died a lingering. and shameful death a decade or
>so ago, and he proposes to start it. all over again - 48 volumes this
>September and 80 more next year, in. editions I have described, at the
>prices specified. He proposes to launch his. amazing venture simultaneously
>in Britain and the United States, with. the massive firepower of Random
>Century at. his back in this country, and the dashing cavalry of Knopf
>across the water, and no one who loves literature and courage. will forbear
>to. cheer.

At the time this article. was written I had believed for some time that columnists in the Times and other journalists. had been making references to my situation. Nothing unusual about this you may think, plenty of. people have the same sort of ideas and obviously the papers aren't writing. about them,. so why should my beliefs not be as false as those of others?

What. makes this article so extraordinary is that three or four days immediately. preceding its publication, I had a meeting with a friend, during the course of which we discussed. the media persecution, and in particular that by Times columnists. It seemed to me,. reading the article by Levin. in Saturday's paper, that he was describing in some detail his "artist's impression" of that meeting. Most. telling are the final sentences, when he writes, "The madman bursts into. tears, and swears it is all true. And it is." Although I did. not "burst into tears" (he seems to be using a bit of poetic licence. and exaggerating) I did try hard to convince my friend that it was. all true; and I am able to concur with Mr Levin, because, of course, it. is.

At the beginning of the piece Levin reveals a fear of being attacked. by the "irrational" subject of his story, saying. "I have no reason to believe that he is violent,. but he should certainly be approached with caution". This goes back to the xenophobic propaganda. of "defence" against a "threat" which was seen at the very beginning of the harassment. The. impression of a "madman running loose" who needs to. be controlled through an agency which assigns to itself the. mantle of the "police" is also one which had been expressed. elsewhere.

In the. final paragraph of this extract, his reference to Everyman's Library as. having "died a lingering and shameful death a decade or so ago" shows clearly what sort of conclusion they wish to their campaign. They. want a permanent solution, and as. they are prevented from achieving that solution directly, they waste. significant resources on methods which have been repeatedly shown. to be ineffective for such a purpose.

-=-=-=

1990 the first public incident occurred on. a tube train on the Northern line. Two men and their girlfriends recognised me; the women sprang to. my defence,. saying "He looks perfectly normal, he doesn't look ill". Their boyfriends of course knew better, and followed the party line;. one of them made reference to. an "operation", apparently to work at the tube station but implicitly to a visit that I had. made to hospital a couple of weeks previously.

In August 1990 going home from college, soon after getting on. a tube train at Gloucester Road I was followed. by a group of four youths, who started a chant of abuse. That they were targeting me was confirmed by. other people in the carriage, one of whom asked the. other "who are they going on at, is it the bloke who just got on?" to which the second replied "yes,. I think so". I was tempted to reply, but as. in every other instance the abusers are enabled. in their cowardice by physically outnumbering the abused; any confrontation would result in my being beaten up, followed by. a complaint to the police that "he. attacked us", and of course he's ill, so he must have been imagining that we were getting at him. Shitty,. aren't they?

But the shittiness of the four youths on the tube train is. as nothing compared to the episode on the National Express. coach to Dover in the summer of 1992.. While going on holiday to the Continent I was verbally set upon by a couple. travelling sitting a few rows behind. The boy did the talking, his female companion contributing only a continuous. empty giggling noise. He spoke loudly to ensure other people. on the coach heard, always about "they" and "this bloke". but never naming either the abusers or the person he was talking about. He. said "they" had "found somebody from his school, and he was always really stressed. at school". They must have dug deep to find enemies there; perhaps someone who dropped. out of school, someone who didn't do too well later, who was jealous and. keen to get their own back? The boy also said "he was in. a bed and breakfast for only one night and they got him".. By a not unexpected coincidence I had been in a B&B in Oxford a week previously, which had been booked from work;. other things lead me to the conclusion that the company's. offices were bugged for most of the 2 1/2 years. that I was there, so "they" would have known a room in the. B&B had been booked. (But I'll bet "they" didn't tell the company's managers their offices were. bugged, did they?).

After a few minutes of this I went back. to where they were sitting and asked where. they were travelling. The boy named a village in France, and the. girl's giggling suddenly ceased; presumably it permeated to her brain cell what the purpose of the boy's abuse. was.

This and other set-up situations are obviously calculated to. provoke a direct confrontation. which would bring in the police, with the abusers claiming that they were the. ones attacked. Again in 1992, outside the house where I was living in Oxford I was physically. attacked by someone - not punched, just grabbed by the coat, with some verbals. thrown in for good measure. That was something the people at work. shouldn't have known about... but. soon after a couple of people were talking right in front of me about, "I heard he was attacked". The. UK police have a responsibility

for preventing assault occurring, but they do not seem. to take any interest in meeting that responsibility.. I suppose their attitude is that harassment does not come within their remit unless it involves physical assault,. and they will only become involved once that happens. That is of course. quite the wrong attitude for them to take, but. as I now understand, the police investigate only the crime they wish to investigate; if they. do not take your complaints seriously then there is nothing you can do to. make them take. action.

-=-
-= my response to the harassment. -=
-=-

My first reaction in. 1990/91 was to assume that if I broke contact then they would not be able to follow and would lose interest. So. I did the things that have been. suggested by other people; I sold my television, stopped listening to the radio and tried to withdraw away. from the sources of abuse as much as possible.. I reasoned that they must have more important things to. deal with and that normal people would simply leave me alone if it were made difficult for them. to continue their harassment.

I reckoned without the sheer vindictiveness of. the abusers. They did not let. up but instead "got to" people around me, mainly people at work, to do their dirty work for them. I went to see my GP, who refused to believe. what he was being told, and. refused to direct me on to anyone who could be of practical assistance.. It was not until three years had passed that the GP admitted the matter was outside his competence and. suggested going to the police.

In the summer of 1994. we called in counter-surveillance experts from a private detective agency. to sweep our house and telephone for bugging devices. They conducted a thorough search and found nothing; but. as noted above, since the existence of surveillance was. being forced in my face by the harassers, you would expect them to have. taken the possibility of a counter-surveillance sweep into account. when planning the type of devices to be. employed.

In Easter 1995 I made. a complaint to my local Police station in London, but the police have. not expressed any intention to do anything about the continuing harassment ("we're not saying. it's happening and we're not saying it isn't happening" were the. words used). I think the officer I spoke to at. Easter wasn't aware of it happening, although other members of the police. force obviously do know.

From April. 1995 until the present time the matter has been discussed in a lot of detail on the Usenet (Internet) "uk.misc" newsgroup. That. discussion has given birth to the article which you. are now reading. My hopes in posting to Usenet were. that wider publicizing would discourage the security services from continuing. their harassment, and "draw people out" into concurring with the truth of what was being said. Neither. of those have followed, but the. discussion has served a purpose in allowing this structured report to be. created.

The viciousness of the slanders and personal denigration also. points to MI5; they traditionally "protect". the British state from politicians of the wrong hue by character assassination, and in this case. are using their tried and. tested methods to murder with words an enemy they have invented for. themselves.

And there are precedents.. Diana and Hewitt were alleged to have been filmed "at it" by an Army intelligence team which had. operated in Northern Ireland, these allegations were made by someone called Jones. who had been on. the team. His statements were denied by the defence establishment who tried to character-assassinate by. describing him as the "Jones twins". Funny how if. you tell the truth, then you must be ill, isn't it? Thought only communists. behaved like that?

Hewitt later said that he'd been. spoken to by someone in the army who revealed the existence of videotapes of him and. Diana, and that the tapes would be published if any. attempt was made by them to resume their association.

-=-=-=-=-=-=-=-=-=-=-=-=
-= harassment at. work -=
-=-=-=-=-=-=-=-=-=-=-=-=

Once I stopped watching television and listening to the. radio at the end of 1990, "they" had to find other ways of. committing abuses. So they took what must. be for them a tried and tested route; they get at you by subversion of those around you. Since they wouldn't be able to do that with my. family or friends, that meant getting at people in the workplace to be. their mouthpieces. and do their dirty work for them.

They supplied my employers in Oxford with details from what was. going on in my. private life, and what I and other people had said at my home and accommodation in Oxford. So people at. work repeated verbatim words which had been said. in my home, and repeated what I'd been doing recently. Often the most trivial things, the ones from your domestic life,. are the ones which hurt most. One manager in particular at Oxford continuously. abused me for ten months with verbal sexual abuse, swearing, and. threats to terminate my. employment. After ten months I was forced to seek psychiatric help and start taking medication, and was away from work for two. months. I spoke later with a solicitor about what had happened at that company;. he advised it. was only possible to take action if you had left the company as a result of harassment, and such an action would have to. be started very soon after leaving.

Over a year later. the same manager picked on another new worker, with even more serious results;. that employee tried to commit suicide with an overdose as a result of the ill-treatment, and was forced to leave. his job. But he didn't take action against the company, either.. Abuse at work is comparable to that elsewhere in that. tangible evidence is difficult to produce, and the. abusers will always have their denials ready when challenged. And even if a court accepts what you say happened, it. still remains to prove. that abuse causes the type of breakdown I had at the end of 1992. In a recent case before a British court,. a former member of the Army brought a case against others who had. maltreated him ten years previously. Although the court accepted. that abuse had occurred, it did not agree that depressive illness necessarily followed,. and denied justice to the. plaintiff.

Attention all Amateur Operators.
Please Read, and send your comments to the ARRL and Romney Website.

Wednesday 16 November 2005 @ 15:48:10 | Eastern Massachusetts ARRL Romney 'Disses' Amateur Radio In
Televised Town Meeting Posted on Wednesday16 November 2005 @ 15:48:10

Governor Mitt Romney dismissed the role of Amateur Radio operators in emergency communications
during a televised 'town meeting' program last night on WCVB's 'When Disaster Strikes: Segment Two.'
The program featured public safety and volunteer organization officials from
across Massachusetts
among its audience.

Host and moderator Natalie Jacobson asked an increasingly-agitated Governor Romney questions about
communications interoperability, and communication without commercial power.
Romney was next asked
by Jacobson, '...so does it come down to ham radio?...'

The Governor replied in a disgusted tone, 'No, we don't need to deal with ham radio operators...'

Embarrassed public safety officials later tried to put in a good word for Amateur Radio. National
Weather Service Warning Coordination Meteorologist Glenn Field was prepared to state the importance
of Amateur Radio, when Salvation Army Colonel Fred Van Brunt was called upon. Van Brunt remarked
about his organization's quest to improve its communications capabilities and how Amateur Radio has
aided his organization. 'The ham radio situation helps a great deal,' he stated.

'I have already written and submitted a letter to the Governor's Office,' wrote Eastern MA Section
Emergency Coordinator Rob Macedo, KD1CY. 'I have also written an email to Natalie Jacobson.'

ARRL Section Manager Mike Neilsen, W1MPN sent a section-wide email today to all Eastern MA ARRL

members describing the incident along with actions he and his staff were taking to mitigate the
situation.

'[Romney's] attitude about us sets an unfortunate tone within the state's executive branch,' wrote
Neilsen. 'As a former military officer, I see this as a failure in leadership. My immediate concern
is our working relationship within the [Massachusetts Emergency Management Team] environment.'
Neilsen intends to address the Governor's comments as 'an urgent matter' at a meeting on November 17
with Don Carlton from the Massachusetts Emergency Management Agency.

'I was very disturbed about what the Governor stated on the program,' wrote Ron Wood, W1PLW, the
section's Public Information Coordinator. 'It does show that more work is needed by all hams in the
section. It's a great idea to write letters explaining the good we do.' Wood
is attempting to
schedule a meeting with the Governor's office tomorrow so that EMA ARRL staffers might discuss the
matter further.

Tom Kinahan, N1CPE wrote that Governor Romney's comment has made 'a PR problem' for Kinahan in his
role as MA State RACES Officer.

'I've got a roster of over 150 Amateur Radio operators that support local communities, and those of
us that directly support the state government. There are at least double that in terms of people
that are actually out there that I don't have formal paperwork on that support Amateur Radio
emergency communications in some organized manner... The Governor has said that he 'certainly
doesn't need to rely on ham radio' -- where does that leave the RACES program now?'

'I am ashamed tonight that I am a Republican!' remarked one ham radio viewer. '[Romney] speaks in
derogatory tones about hams. He certainly shows an ignorance as to what we do and are capable of. I
suggest a grass roots campaign of local hams calling the State House and The
Governor's Office to
protest.'

One more good reason not to vote for him...but look at the bright side: This will give him a chance to flip-flop again and say how much he likes hams. ;-)

P.S. Even though I'm not a resident of the state of Massachusetts, I wrote a letter of protest at the time. As a non-resident, you can imagine how far it got.

That is certainly one avenue to pursue; however, some roads lead to
better places than others.

How about a re-evaluation of us, our plans, our equip., etc. and instead
of finding fault with other--why they do not find our services
desirable, we ask the question, "What can we do to become
up-to-date-current and make our services desirable--to the point they
can't ignore us?"

But then, that stands a fat chance ...

Regards,
JS

Ummmmm...did you guys see the date on that "news release".

It was Nov of 2005. (2 years and 1 month ago)

Then again this seems to not be an issue with most hams.
Being several days late and $25 short is standard operating
procedure.
Heck most of the hams I hear on 75 Meters on a nightly basis
at night in 4 and 5 land still sound like their stuck in the 1940's
and 50's with all their
use of the N-word and racial tirades against Obama and Hillary and all
the other assorted
obsolete BS spewed out each evening. What else is new folks ?

With getting all the politics.

Romney just lost my VOTE. I have been a ham for 35+ years and working in emergency services for over 45 years he is a looser. NO, I will not vote for McCain either, and I'm a proud VETERAN.

Cecil:

If you do nothing else, check out this youtube link:

http://youtube.com/watch?v=s08RJ2_o_MM

A man with a rational mind does much to restore faith in America. He speaks of the "insanity" running rampant in America ...

Better yet, use the search on the youtube page and search for all the vid clips on Ron Paul.

Regards,
JS

It's not ignorance - he's clearly in Motorola's back pocket, to take
away whatever ham spectrum he can to give to the big communications
cartels. All in the name of "emergency response", of course, but
anyone who can add up a couple bandwidths knows that the real need is
to give it to the cellphone companies.

The ARRL has to kind of pussyfoot around these issues because you
can't have hams being against the communications cartels as long as
"emergency responder radio" spectrum is their trump card.

Everyone I know, who is "cutting edge", is ~1Ghz+. My 100W Ghz amp is unbelievable--I am now constructing the 1KW (and I am telling you, there ARE major design/construction problems to deal with!)--dreaming about 4KW!

HF is just too-too ...

It was my understanding when it was first brought up that what he meant was they the government agencies were fully able to handle there own comm needs. It would have truly been udder stupidity on his part for him to have meant anything else. It is true that the amateur radio community is needed less and less even though we are more than willing and able to fill the need. A very small case in point: A charity walk/run used to be handled by the local ham radio clubs providing emergency communication and coordination via handheld radios and the local repeaters. This past year it was handled by the Girl Scouts using cell phones.

Jimmie

You wrote:

> You miss the point, the smear is NOW.

No, 'You', I believe YOU miss the point. *Romney* said he did not like ham radio operators. Words from *his* own mouth. Period.

Please tell me why -quoting- what HE ACTUALLY SAID is a smear...and if by some stretch of the imagination, you manage to twist a direct quote around as a being a smear, well then, Romney smeared himself. Finally, are we to give him a free pass just because he said it 'x' number of (years) (weeks) (days) ago?

> Why bring up comments that are
> two years OLD, NOW?

Well, because he never retracted the statement. Presumably then, these are STILL his feelings towards hams. Again, does a negative statement he makes just 'time out' and shouldn't be quoted after a certain period of time even though he still stands by the statement? What period of time would you suggest that after which, we just ignore what he said?

http://www.isonliveradio.com/iarba/petition/

If You are like minded please sign this IARBA Petition at the link above and join us in asking the Minister and the ACMA to reverse the previous governments unfair ban on new entries to Digital radio. With the inclusion of DRM theres plenty of room for left out community stations narrowcast and narrowband and new entrants.

To
Senator the Hon
Stephen Conroy

Minister for Broadband,
Communications and the
Digital Economy

DEPUTY LEADER OF THE
GOVERNMENT IN THE SENATE

Suite MG70
Parliament House
Canberra ACT 2600

Dear Sir,

We the digitally undersigned ask that in the interests of media diversity, fairness and good planning that you reverse the the previous governments unfair ban on new entries into Digital radio.

We ask that you consider a two-tiered Digital Radio implementation that includes the DRM Standard so that country areas will not be left out of access to Digital Radio. As you may be aware DAB Plus performs poorly outside metropolitan areas.

We ask that DRM be included both for those broadcasting stations left out of current DAB Plus proposals: existing community stations, narrowcasters, narrowband stations and also that it be included for new entrants.

We also ask that in any strategy that your department undertakes to promote Digital Receivers, that any such promotion includes those models that can receive both the DAB Plus and DRM Standards.

DRM can fit 8 CD-quality stations into the same amount of bandwidth that DAB uses. DRM is the worlds only, open standard, universal, digital on-air system. Peter Senger, Chairman of DRM: "DRM is a great way to enjoy not only international radio stations, but also some local and national radio. In many countries, particularly those with

large rural areas, the combination of DRM and DAB gives broadcasters a tailor-made way to upgrade to digital radio and give their listeners access to a greater range of stations than ever before."

I would like to point out as a former Assistant RACES Officer for a local community in Massachusetts, that Mr. Romney is absolutely correct.

The current EMA-ARRL structure co-exists with the STATE RACES Officer and going nothing.

ARES has nets that do NOTHING. RACES does nothing. 85% of the communities south of Boston do not have any active participation in the RACES drills.

One of the studio engineers was a ham and threw out the question to Jacobsen as something to hit Mr. Romney.

Frankly, MEMA is much better organized than everyone would think. A total communications melt-down is impossible in Massachusetts due to MEMA, SP and SG preparations. The Air Wing is ready to roll out portable towers for cell phones. The SP has several rolling CC and backup towers for the 800 Mhz system. Each town has the 800 Mhz radios provided by the state.

Just so you know that some of those guys actually doing things are HAMs. They learned by being hams. Yet, we don't need hams as a massive fodder to materialize for the day of rescue. I would like to think Mr. Romney is right about this as we are paying our TAX DOLLARS for service!

This seems to be true, there is an ARES net near me that does not do
any training but encourages parcipitants to do conversation after
everyone has checked in. In the course Emergency Communication I we
are discouraged from doing conversation during emergency communication
and encouraged to be brief and accurate with our communication.

Your all correct. MARS is doing nothing either except checkin nets
every other Saturday where no training is done. After 70 years
of AARS/MARS continuous service I droped out of it last year.
Only few people left on local nets, and mostly no training, just
idle conversation takes place.
Joe/KH6jF (formerly ABM6JF with MARS)

54. KAM TNC for sale

Newsgroup: rec.radio.amateur.digital.misc
Date: 2008-02-19 21:51:40 UTC
From: Henry <wa0goz@arrl.net>
Message-ID: <acidnffYtLb10ibanZ2dnUVZ_tTinZ2d@comcast.com>

This Kantronics KAM Plus All Mode TNC for HF & VHF has the ver. 7.0 firmware and can be updated further with updates from Kantronics. It is a dual port TNC.

This unit is in AS NEW condition. It was removed from my station where it was all connected and working fine. I am a non smoker so it is free from any smoke or smell!

I have the DC power cord, cables, all the manuals, box and a connecting cable for Icom. Other radio cables are all common and should be no problem to find. http://tinyurl.com/3yrgtf has many KAM to radio cables.

This is a great deal on a nice clean KAM Plus All Mode Packet TNC. This KAM Plus has been operating flawlessly for about 14 years. It runs PACKET, RTTY, ASCII, AMTOR, WEFAX, CW, NAVTEX/AMTEX, KISS, HOST, G-TOR and PACTOR.

The KAM-XL is the closest replacement.

MSRP $400

I am asking $180 plus shipping CONUS.

I also have the HostMaster II software and manuals for the KAM. I am asking $25 for that.

58. UIView Question

Newsgroup: rec.radio.amateur.digital.misc
Date: 2008-02-24 18:48:13 UTC
From: lagman <dan_hoffard@hailmail.net>
Message-ID: <a7fc28cb-c9aa-467d-a7c4-4f3314106a6f@c33g2000hsd.googlegroups.com>
Source record: 443

I am running an IGate with UIView32. UIView32 also has the
ability to send and receive personal messages. Say, for example, I
bring up findu.com and see a mobile station 100 or so miles away. I
also see another IGate set up to gate Internet to RF close to the
mobile station. Is it possible for me to send this person a message?
I was hoping there would be a way for me to route a message to the
IGate (via the Internet), then the IGate would gate the message to
RF. Then, when the person replies, it would be gated RF to Internet,
and back to me.

Also, here is a less complex scenario. I have noticed many other
IGate operators often send and receive their own personal messages.
Can I send and receive messages to and from them? This would be non-
RF communications (all via the Internet).

In general, I'm wondering how much I can do with my current setup (a
receive only RF to Internet IGate).

Thanks,
Dan

Amateur Radio License Exam Preparation Software
Getting your Amateur Radio License has never been easier. Effective February 23, 2007 the FCC removed the Morse Code requirements for all Amateur Radio License Classes . Since that date, applicants for a Technician, General or Extra Class Amateur Radio License no longer have to demonstrate proficiency in Morse Code. You just have to pass the applicable written examination.

That's where we come in. Our amateur radio license exam preparation software serves as a training aid to help amateurs and prospective amateurs pass the Volunteer Examiner Coordinator's (VEC's) administered exam. When you can consistently pass the exams given by our exam preparation software, you will almost certainly pass an actual Volunteer Examiner Coordinator's (VEC's) administered exam.

Our amateur radio license exam preparation software uses the latest officially released Volunteer Examiner Coordinator's (VEC's) approved question pools. The program breaks the test into different sub-element. Integrated into the software are illustrations and Part 97 rules pertaining to the current question. The program tracks the progress of the tests taken. Once you have mastered each sub-element you are ready for the officially administered exam.

Visit our web site at http://www.oaklanesoftware.com

Wait a little while and the FCC will grant us a single block license as they did in the Seventies for CB licensees. Then you can make up your own callsign and have at it. This is how dimly we are viewed by the powers-that-be.

It would be better if you moved from UI-View to something that is not orphaned and out of date. The author had the source code destroyed before he died and I don't think it has been touched in four years. There are too many better and more advanced APRS programs out there that are continually being enhanced.

The program is dead, not being developed, has not been enhanced in
years. Stay away from orphaned programs and get with something that is
actively being developed, enhanced, and supported by the author.
Everything else is just dead old junk software.

Unforunately, you have no idea of the situation on the ground here. It is
petty to vote for someone other than Mr. Romney soley since he said that we
do not need the hams. He is quite correct. He never made a disparaging
remark about any hams. The Chronicle interviewer was unable to make any
concrete point to challenge Mr. Romney's assertation.

The only problem with that suggestion, is that Roger had all the source
code to his program destroyed so no could pick it up and continue
development. That's why people should stay away from UIView. You cannot
do anything to support it.

Hello All!

How to join to Ham radio? I will get Call-Sign, license, etc. I'm
interesting in short wave, digital radio.
I'm living in Ukraine. I'm receiving a lot station from Europe.
(Italy, Germany, Slovakia, Finland, France, Bulgaria, etc) but no
station from Ukraine. (Maybe It's because my antenna oriented to west)
So, I'm asked in this news.group. How can join a club? Now I'm
interesting in receiving in 7 and 10MHz. But I'm thinking about make
RF transmitter.

Thanks.

80. Linux PSK31 software

Newsgroup: rec.radio.amateur.digital.misc

I've been inactive for a couple of years but want to put a bit of PSK31 into the air this lovely spring.

Last time I was active I was using Windows software--but now I need a linux PSK31 program. Which ones do you like? Doesn't need to be fancy or have many bells and whistles, though RTTY capability would be nice for the occasional contest.

I've done a couple of quick searches--it's easy to find what Win PSK programs are popular and well-liked, but I'm not finding much about linux alternatives. Thanks!

radio.linux.org.au/ is a great resource

I suggest for psk31 and rtty, the best is fldigi at
www.w1hkj.com/Fldigi.html

... like THAT! :-) Many thanks for the suggestion--I'll give that a try
this weekend when I get things set up! It appears fldigi has rig
control--that certainly might be handy, too. 73 ES TNX!

I'll second that recommendation. fldigi is under active development,
is free, and offers rig control among other features. A Windows version
is under development. It doesn't yet do all the things that MultiPSK
does, but it is coming along...

linPSK and gMFSK also work. At least for receiving.

A Case of Network Identity Theft?

"Digital real estate leased to one of the Internet's oldest landholders appears to have been quietly seized by e-mail marketers closely associated with an individual once tagged by anti-spam groups as one of the world's most notorious spammers.

What's remarkable about this case study is that it pits a vocal spammer against the American Registry for Internet Numbers, which has yet to take action. ARIN is one of five regional Internet registries worldwide that is responsible for allocating IP addresses (ARIN handles this process for the United States, Canada and 22 Caribbean countries).

The real estate in question is Internet address space long ago issued to San Francisco Bay Packet Radio, an organization that was involved way back in the 1970s in testing ARPANET, a predecessor to the global commercial Internet that we all use today. That organization was given the rights to do whatever it wanted with any numeric Internet addresses that begin with 134.17 (an allocation that is known in the industry as a "slash 16" or "/16," or enough Web space to accommodate up to 65,536 unique Internet addresses). "

<snip> The last paragraph:

"I could not find current contact information for anyone who worked on the original San Francisco Bay Packet Radio project. If you or someone you know was affiliated with that effort, please drop me a line or leave a comment below."

Test Preparation Software

Pass your US FCC ham radio license test with ease. Our test preparation software
serves as a training aid to help amateurs and prospective amateurs pass the VEC's administered test. When you can consistently pass the test given by our test preparation software, you will almost certainly pass an actual test.

Our ham radio license test preparation software uses the latest officially released VEC's approved question pools. The program breaks the test into different sub-element. Integrated into the software are illustrations and Part 97 rules pertaining to the current question. The program tracks the progress of the tests taken. Once you have mastered each sub-element you are ready for the official test.

Visit our web site at http://www.hamradiolicense.net for more information.

He really has no point. My guess he is just trying to pimp the
equipment. Probably works for Flex Radio.

LOL!

Where, exactly, would you expect posts about digital equipment--other
than a digital/equipment thread?

Maybe rec.radio.amateur.smokesignals?

Geesh, takes all types! :-(

Regards,
JS

If you failed to notice, the transceiver comes with open source
software; Meaning, you can modify the software to operate with any
digital data transfer protocol (modes, to the illiterate) which anyone
can imagine.

Regards,
JS

Yanno, the illogic of that statement overwhelms me. It makes me wonder where people capable/prone-to making such statements come from?

I mean that statement presupposes that an interest in state-of-the-art equipment is some sort of illicit/insane leaning which needs to be ignored/attacked.

What, you are still awaiting the return of the spark-gap transmitters? This all, only, sounds to me as if you wish burden others with your preferences/likes/interests/beliefs/etc ... What? Everyone is an amateur politician these days?

Regards,
JS

My Sony ICF-S79V shower radio has a TV band receiver enabling it to get certain analogue TV broadcasts. Starting Feb. 2009, the U.S. is switching to digital TV broadcasts. Are there radios capable of receiving digital broadcasts?

No. The audio in digital TV is digital. But AM and FM will
still work.

That's NOT what he asked.

I know of no radios under design that will pick up DTV audio.

The GNU software-defined radio may do so, and there are DTV boards
for amateur service available from various European experimenters.

You might be able to put one of those $40 DTV converter boxes
to use in that way; many have baseband audio outputs.

Test Preparation Software

Pass your US FCC ham radio license test with ease. Our test preparation software serves as a training aid to help amateurs and prospective amateurs pass the
VEC's administered test. When you can consistently pass the test given by our test
preparation software, you will almost certainly pass an actual test.

Our ham radio license test preparation software uses the latest officially released VEC's approved question pools. The program breaks the test into different sub-element. Integrated into the software are illustrations and Part 97 rules pertaining to the current question. The program tracks the progress of the tests taken. Once you have mastered each sub-element you are ready for the official test.

Visit our web site at http://www.hamradiolicense.net for more information

Source record: 267

As of 2-Dec-08 there is only one bid and the auction closes
on 3-Dec

This is an unmodified like new Tigertronics SignaLink Model
SL-1+ Sound Card - Radio Interface. The SL-1+ is described
in detail at <http://www.tigertronics.com/>. Just click on
SignaLink SL-1+. This is not the USB version.

The internal jumpers are set for use with a Kenwood but can
easily be reset for other rigs. You will receive the SL-1+,the
manual from Tigertronics and two interface cables. The SL-1+
radio cable has an 8-Pin Mic plug that was never used. The
other is a never used 5 foot cable with male 3.5 mm stereo
connectors.

Worked perfect when last used but sold as is. Will not ship
outside of the US. Shipping is $8.00 for Priority Mail

Bidding starts at $45 and End Dec-03-08 17:08:36 PST

Hi,
Ive been out of the ham radio loop for a bit and need some guidance. I have an Icom IC-725 xcvr and want to know what kind of cable and where to get a good deal on it, to connect my Vista computer to my rig. Ive seen some CV-I(?) cables, but dont really know what I need. I have the DXLab suite and would like to use that program as my control program (If there are any better interfaces out there, Id be open to hearing about them). Ive seen some cables for about $14 to $35 that look like they only have a small phone connector on one end and a usb connector on the other, and come with a driver on cd. Is this something that would work for me? Or do I need to look for something else? Any help is appreciated. TIA.
Brian

134. Soundmodem-Userspace converse mode

I have read that with a regular external tnc you can go into converse mode in which you can type a message and the tnc converts it to a packet/packets. The packets can then be sent to another tnc essentially setting up a simplex packet network. I have been playing with APRS and have gotten the user-space soundmodem driver to work with xastir perfectly.

I was wondering if there is anyway to use soundmodem in a type of "converse mode" by just typing a message that is converted by soundmodem? I have tried echoing from the command-line to /dev/soundmodem0 but haven't been able to get it to work. I also tried writing a small python script that would write a string to /dev/soundmodem0, but that also did not work.

Thanks for any help.

There is a difference between a modem and a TNC. A modem just converts bits to tones and vice-versa. A TNC has a processor and can do intelligent things like converting typed text into packets. A modem cannot do that.
When using a modem, there has to be some application that performs the packet layer functions. In Linux, this function can also partly be performed by the kernel AX.25 functionality, but you still need the application to setup the connections and provide the data.
